

# NEW ERGONOMIC POOL LIFT SEAT

**SPECTRUM**  
AQUATICS®  
A PLAYCORE Company

Introducing our newly re-designed Ergonomic Pool Lift Seat, coming standard on all our Battery-Powered ADA Pool Lifts in 2025

## Upgrades in Design

- **Ergonomic Comfort:** The ergonomic design ensures maximum comfort and reduces pressure points during use.
- **Safety First:** Integrated handholds provide extra support for easy and secure transfers.
- **Hygienic & Durable:** Draining channels prevent water pooling, reducing the risk of slipping and promoting faster drying.
- **ADA-Compliant:** Fully ADA-compliant, meeting industry standards for accessibility and safety.
- **Made of rotomolded LDPE (low-density polyethylene) material** that repels water, is resistant to pool chemicals, and is highly impact-resistant, and flexible, allowing it to withstand constant use, bending, and pressure without cracking or breaking.

*"I like this lift seat very much. Many features of the design contribute to better ergonomics. With this lift, I can make the transfer to and from my wheelchair independently, and I appreciate that so much."* Lori M. of Missoula, MT

**Support You Can Rely On. Every Lift, Every Time.**
